Township	<u> </u>	South, Range	<u> </u>	West, Section	<u> </u>	<u> </u> $\frac{1}{4}$	<u> </u> $\frac{1}{4}$	
Township	<u> </u>	South, Range	<u> </u>	West, Section	<u> </u>	<u> </u> $\frac{1}{4}$	<u> </u> $\frac{1}{4}$	

Please attach an accurate map or understandable sketch of the area. Maps should be scaled to clearly show areas of proposed surface disturbance.

Proposed Operat. is

Estimated Period of Operations: January 1, 1995

Describe the type of operations and how they will be conducted, including the location and size of areas where surface disturbance, structures, facilities, etc., are proposed. Calculate the total acreage of proposed disturbance (One acre = 43,560 sq. ft.):

Millsite located on 5 acres in the N.W. corner of the S.W. $\frac{1}{4}$ of
S-13 T-41-R12W adjacent to Kolob Road. Initially the facility
will consist of a covered 20' x 50' structure, a metal water
storage tank and two water recovery pits. Utilities will require
one electrical pole and water lines to be ran from nearby facilities
A security fence will be placed around the millsite.

Access Routes

Described any proposed improvement of existing roads:

Culbert placed where existing road exit off Kolob road
Maintaining existing road as needed.

Describe new roads proposed (include length, width, estimated maximum cutbank height, and type of equipment used):

None

Existing Disturbance

Describe any existing surface disturbance, structures, facilities, etc..
A map or sketch showing existing surface disturbance, structures, facilities, etc. is recommended.

This is the old abandon site of an oil refinery. There is an old
earthen pond or tank that is polluted with oil reside. There
is the remnants of an old metal water tank on site.

Proposed Reclamation

Describe any proposed reclamation procedures or other measures to be taken to prevent unnecessary or undue degradation of public lands:

Top soils will be saved, where possible, for replacement after the final operation of reshaping has been completed. All possible measures to control erosion, landslides and water runoff will be pursued.

No known toxic materials will be used in this operation.

The reshaping of the area disturbed will be performed as soon as feasible. The top soil will then be replaced and the native vegetation will be replanted.

There is very little wildlife in this area, although, any that may be present will be protected and their habitat preserved.

(Continued below)

Reclamation of all areas disturbed will be completed to the standards described in 43 CFR 3809.1-3(d) and reasonable measures will be taken to prevent unnecessary or undue degradation of Federal lands during operations.

Signature

12-7-94
Date

All reasonable measures will be taken to ensure that this operation will not cause unnecessary or undue degradation of the Federal lands.
